*The Journal of General Psychology, 115*(4), 441–444

# Index to Volume 115

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–112
Number 2 (April): 113–224
Number 3 (July): 225–336
Number 4 (October): 337–442

## AUTHOR INDEX

Anshel, M. H. *The effect of mood and pleasant versus unpleasant information feedback on performing a motor skill.* 117–129.

Baker, A. H. *The relationship of undershooting (anticipation) error in space localization to spatial dimension and spatial category width.* 161–170.

Bentley, A. C. *A survey of Celiac-Sprue patients: Effect of dietary restrictions on religious practices.* 7–14.

Chaffin, R., & Herrmann, D. J. *Effects of relation similarity on part-whole decisions.* 131–139.

Chastain, G. *Does order of letter analysis contribute to the parafoveal identification asymmetry?* 397–402.

Chastain, G. *Target letter inclusion in single and multiple word substrings and identification accuracy.* 141–149.

Dasgupta, B., Biederman, G. B., & Robertson, H. A. *Latent inhibition: Attention through response-contingent shock in rats.* 75–82.

Goolkasian, P. *Illusory conjunctions in the processing of clock times.* 341–353.

Kingma, J., & Korpan, C. A. *Test for randomness in behavior for observational research.* 83–100.

Lester, D. *The perception of different methods of suicide.* 215–217.

Lester, D., & Lindsley, L. K. *Inward and outward irritability in the suicidally inclined.* 37–39.

McAllister, H. A., Bregman, N. J., & Lipscomb, T. J. *Speed estimates by eyewitnesses and earwitnesses: How vulnerable to postevent information?* 25–35.

McFarland, R. A., & Kennison, R. F. *Asymmetrical effects of music upon spatial-sequential learning.* 263–272.

McKelvie, S. J., & Pullara, M. *Effects of hypnosis and level of processing on repeated recall of line drawings.* 315–329.

Mason, S. E., & Reid, H. M. *Encoding in anticipation of immediate or delayed testing.* 63–67.

May, J. G., Grannis, S. W., & Dunlap, W. P. *Reaction time measures of backward masking.* 171–187.

May, J. G., Martin, F., MacCana, F., & Lovegrove, W. J. *The effects of spatial frequency and temporal waveform on three measures of temporal processing.* 293–306.

Marohn, K. M., & Hochhaus, L. *Semantic priming increases and repetition priming decreases apparent stimulus duration.* 51–61.

Marshall, P. M., & Jeter, B. *The absence of practice effects on a forced-choice temporal order judgment task.* 419–423.

Morrison, P. R., & Gates, G. R. *Assessment of a microcomputer-based version of the Austin maze.* 307–314.

Murray, J. B. *Psychopharmacological therapy of deviant sexual behavior.* 101–110.

Norton, N. A., Houston, H. O., Johnson, J. E., & Zechmeister, E. B. *Memory for event frequency as a function of depression, age, intentionality, and level of processing.* 369–381.

O'Donnell, J. P., Radtke, R. C., Leicht, D. J., & Caesar, R. *Encoding and retrieval processes in learning-disabled, head-injured, and nondisabled young adults.* 355–368.

Peron, R. M., & Allen, G. L. *Attempts to train novices for beer flavor discrimination: A matter of taste.* 403–418.

Poirel, C. *Rhythmometric analyses of circadian variations of grooming behavior in the mouse: Research perspectives in behavioral chronobiology.* 187–201.

Reid, H. M., & Collins, R. L. *Sound-induced seizure: Asymmetries exhibited are related to the latency of seizure onset.* 257–262.

Reinhardt-Rutland, A. H. *Interaural transfer of aftereffect of changing sound level in a tone.* 69–73.

Simmons, H. J., Garber, E. E., & Simmons, G. T. *An order statistic for coarse measurement scales: Ce derived from U.* 203–213.

Simón, A. & Simón, A. *Imprinting in a predatory species, the Florida Burrowing Owl (Speotyto cunicularia floridiana Ridgway).* 383–387.

Smith, J. M., Bell, P. A., & Fusco, M. E. *The influence of attraction on a simulated commons dilemma.* 277–283.

Spanjer, A., & Tate, F. S. *Embedded-figures performance and telecourse achievement.* 425–431.

Stephens, R. F., & Pate, J. L. *Response competition and target word detection during shadowing in a dichotic listening task.* 285–292.

Terry, W. S., & Howe, D. C. *Effects of incidental pictorial and verbal adjuncts on text learning.* 41–49.

Tripathi, K. N., & Agarwal, A. *Effect of reward contingency on intrinsic motivation.* 241–246.

Viney, W., Parker-Martin, P., & Dotten, S. D. H. *Beliefs in free will and determinism and lack of relation to punishment rationale and magnitude.* 15–23.

van Dam, G., & Brinkerink-Carlier, M. *The influence of self-generation of retrieval cues during learning or recall of a text.* 151–159.

Wallace, B. *Hypnotic susceptibility, visual distraction, and reports of Necker cube apparent reversals.* 389–396.

Ward, D. A., Seccombe, K., & Bendel, R. *Influenceability of sex differences under conditions of risk taking.* 247–255.

Weiler, E. M., Katbamna, B., Nileshwar, N., & Dell'Aire, A. *Redundancy: A simple principle in independent adaptation techniques.* 331. (Correction to article that appeared in Vol. 114(4), 411–421.)

Weller, L., & Livingston, R. *Effect of color of questionnaire on emotional responses.* 433–440.

Wuensch, K. L. *Female prairie deer mice prefer conspecific flesh over contraspecific flesh.* 273–276.

Yamada, J., Matsuura, N., & Yanase, Y. *Does knowledge of romaji facilitate English reading?* 229–239.

# TITLE INDEX

The absence of practice effects on a forced-choice temporal order judgment task. *Philip H. Marshall & Brenda Jeter.* 419–423.

Assessment of a microcomputer-based version of the Austin maze. *P. R. Morrison & G. R. Gates.* 307–314.

Asymmetrical effects of music upon spatial-sequential learning. *Richard A. McFarland & Robert F. Kennison.* 263–272.

Attempts to train novices for beer flavor discrimination: A matter of taste. *Rosalynn M. Peron & Gary L. Allen.* 403–418.

Beliefs in free will and determinism and lack of relation to punishment rationale and magnitude. *Wayne Viney, Pamela Parker-Martin, & Sandra D. H. Dotten.* 15–23.

Does knowledge of romaji facilitate English reading? *Jun Yamada, Nobukazu Matsuura, & Yosuke Yanase.* 229–239.

Does order of letter analysis contribute to the parafoveal identification asymmetry? *Garvin Chastain.* 397–402.

Effect of color of questionnaire on emotional responses. *Leonard Weller & Randy Livingston.* 433–440.

The effect of mood and pleasant versus unpleasant information feedback on performing a motor skill. *Mark H. Anshel.* 117–129.

Effect of reward contingency on intrinsic motivation. *Kailas Nath Tripathi & Adesh Agarwal.* 241–246.

Effects of hypnosis and level of processing on repeated recall of line drawings. *Stuart J. McKelvie & Maria Pullara.* 315–329.

Effects of incidental pictorial and verbal adjuncts on text learning. *William S. Terry & Daniel C. Howe.* 41–49.

Effects of relation similarity on part-whole decision. *Roger Chaffin & Douglas J. Herrmann.* 131–139.

The effects of spatial frequency and temporal waveform on three measures of temporal processing. *James G. May, Frances Martin, Finian MacCana, & William J. Lovegrove.* 293–306.

Embedded-figures performance and telecourse achievement. *Allan Spanjer & Faye Smith Tate.* 425–431.

Encoding and retrieval processes in learning-disabled, head-injured, and nondisabled young adults. *James P. O'Donnell, Robert C. Radtke, David J. Leicht, & Robert Caesar.* 355–368.

Encoding in anticipation of immediate or delayed testing. *Susan E. Mason & Howard M. Reid.* 63–67.

Female prairie deer mice prefer conspecific flesh over contra-specific flesh. *Karl L. Wuensch.* 273–276.

Hypnotic susceptibility, visual distraction, and reports of Necker cube apparent reversals. *Benjamin Wallace.* 389–396.

Illusory conjunctions in the processing of clock times. *Paula Goolkasian.* 341–353.

Imprinting in a predatory species, the Florida Burrowing Owl (*Speotyto cunicularia floridiana Ridgway*). *Armando Simón & Angela Simón.* 383–387.

The influence of attraction on a simulated commons dilemma. *Jeffrey M. Smith, Paul A. Bell, & Marc E. Fusco.* 277–283.

The influence of self-generation of retrieval cues during learning or recall of a text. *Gerrit van Dam & Michele Brinkerink-Carlier.* 151–159.

Interaural transfer of aftereffect of changing sound level in a tone. *A. H. Reinhardt-Rutland.* 69–73.

Inward and outward irritability in the suicidally inclined. *David Lester & Leann K. Lindsley.* 37–39.

Latent inhibition: Attention through

response-contingent shock in rats. *Bikram Dasgupta, G. B. Biederman, & H. A. Robertson.* 75–82.
Memory for event frequency as a function of depression, age, intentionality, and level of processing. *Nancy A. Norton, Holly O. Houston, James E. Johnson, & Eugene B. Zechmeister.* 369–381.
An order statistic for coarse measurement scales: *Ce* derived from *U. Howard J. Simmons, Ellen E. Garber, & Garth T. Simmons.* 203–213.
Psychopharmacological therapy of deviant sexual behavior. *John B. Murray.* 101–110.
Reaction time measures of backward masking. *James G. May, Steven W. Grannis, & William P. Dunlap.* 171–187.
The relationship of undershooting (anticipation) error in space localization to spatial dimension and spatial category width. *A. Harvey Baker.* 161–170.
Response competition and target word detection during shadowing in a dichotic listening task. *Rebecca F. Stephens & James L. Pate.* 285–292.
Rhythmometric analyses of circadian variations of grooming behavior in the mouse: Research perspectives in behavioral chronobiology. *Christian Poirel.* 187–201.
Semantic priming increases and repitition priming decreases apparent stimulus duration. *Kathleen M. Marohn & Larry Hochhaus.* 51–61.
Sound-induced seizure: Asymmetries exhibited are related to the latency of seizure onset. *Howard M. Reid & Robert L. Collins.* 257–262.
Speed estimates by eyewitnesses and earwitnesses: How vulnerable to postevent information? *Hunter A. McAllister, Norman J. Bregman, & Thomas J. Lipscomb.* 25–35.
A survey of Celiac-Sprue patients: Effect of dietary restrictions on religious practices. *Annette C. Bentley.* 7–14.
Target letter inclusion in single and multiple word substrings and identification accuracy. *Garvin Chastain.* 141–149.
A test for randomness in behavior for observational research. *Johannes Kingma & Connie A. Korpan.* 83–100.
